

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION I
475 ALLENDALE ROAD
KING OF PRUSSIA, PENNSYLVANIA 19406-1415

December 13, 2011

Docket No. 030-37842
Control No. 576358

License No. 39-31336-01

Flemming Jensen
General Manager
Havells USA Inc.
(formerly SLi Lighting)
125 A/B Villanova Drive
Atlanta, GA 30336

SUBJECT: HAVELLS USA INC., REQUEST FOR ADDITIONAL INFORMATION
CONCERNING APPLICATION FOR TERMINATION OF LICENSE, CONTROL
NO. 576358

Dear Mr. Jensen:

This is in reference to your letter dated June 1, 2011, that was received by facsimile on November 14, 2011, requesting to amend Nuclear Regulatory Commission License No. 39-31336-01. This also refers to our telephone conversation and e-mail correspondence on December 12, 2011. In order to continue our review, we need the following additional information:

1. Based on our telephone conversation and e-mail correspondence on December 12, I understand that you are closing the possession and distribution location at Sli/Midwest, 221 S. Franklin Road #C, Indianapolis, Indiana. This is the only location listed on your NRC license, and you do not anticipate possessing or distributing licensed material from any states under NRC jurisdiction. Therefore, we can terminate the above-listed license when all licensed materials are removed from the Indianapolis location. Please send us a signed letter, notifying us when all materials are removed so that the license termination can be completed.
2. As of December 31, 2010, SLi Lighting Inc was re-incorporated as Havells USA Inc., and the mailing address was changed from Mullins, South Carolina to 125 A/B Villanova Drive, Atlanta, Georgia 30336. I understand that you are still receiving NRC mail because it is forwarded to you. Because License No. 39-31336-01 will be terminated, no additional actions are needed for that license. However, you will need to submit a request to amend your exempt distribution License No. 39-31336-02E. Requests related to the exempt distribution license should be submitted directly to the Division of Materials Safety and State Agreements (MSSA), Office of Federal and State Materials and Environmental Programs (FSME), U. S. Nuclear Regulatory Commission, Washington, DC 20555-0001.
 - a. For the change of name/change of ownership, you will need to provide the information that is requested in Appendix F of NUREG 1556, Volume 15. This

can be found at the following link: <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v15/sr1556v15final.pdf>. You should also review Chapter 5 and Appendices C, D, and E to assist you in your responses to the questions in Appendix F.

- b. The change of mailing address may result in a change to License No. 39-31336-02E because the first two digits of the NRC license number indicate the state in which mail is received (39- for South Carolina, 10- for Georgia). This will be determined by the licensing staff in FSME/MSSA.
3. The June 1 letter was submitted as a request to allow you to distribute lamps containing Th232 and H3 sources, as well as the Kr85 sources already in certain lamps. The June 1 letter also contained information regarding changes in the lamps as required by the IAEA and EURATOM directive. This request must also be submitted to FSME/MSSA at the address listed in Item 2, for amendment of the exempt distribution License No. 39-31336-02E. The correct reference for the exempt distribution license is NUREG 1556, Volume 8: <http://pbadupws.nrc.gov/docs/ML0103/ML010370065.pdf>, <http://pbadupws.nrc.gov/docs/ML0732/ML073201008.pdf>.

As discussed on December 12, if you want distribution locations in Agreement States from which the exempt lamps will be distributed, you will need to obtain licenses in those Agreement States to possess the radioactive materials. However, the license that allows you to distribute the lamps to persons who will possess them without a license (persons who are exempt from the requirements of a license) remains under the jurisdiction of the NRC, and all correspondence related to that license should be sent to the address for FSME/MSSA listed in Item 2. The current chief for the Licensing Branch is Laura Pearson, and you should be able to contact licensing staff member in that branch by calling (301) 415-2326

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

We will continue our review upon receipt of this information. Please reply to my attention at the Region I Office and refer to Mail Control No. 576358. If you have any technical questions regarding this deficiency letter, please call me at (610) 337-5040.

If we do not receive a reply from you within 30 calendar days from the date of this letter, we will assume that you do not wish to pursue your application.

F. Jensen
