| Simulator Scenario Outline Comments (9/26/2011) | | |
|---|---|------------------------------|
| | Comment | Resolution |
| 1 | Scenario 1 – Add one I/C malfunction for the BOP in order to meet the minimum of 2. | Will add on I/C malfunction. |
| 2 | Scenario 2 – Add an instrument malfunction to the scenario because | |

| | | |
|---|---|--|
| | currently all the failures are component related (see note 3 in ES-301-5). | |
| 3 | Scenario 3 – No Comments. | |
| 4 | Scenario 4 – Add a normal event to the beginning of the scenario. | Will add a normal event to the scenario. |
| 5 | Back Up Scenario – Event 7 should be classified as a major event vice a component malfunction. (See C.2.d of Appendix D.) | Will change to a major event. |
