ATTN: David B. Matthews, Director
Division of New Reactor Licensing

SUBJECT: COMANCHE PEAK NUCLEAR POWER PLANT, UNITS 3 AND 4
DOCKET NUMBERS 52-034 AND 52-035
RESPONSE TO REQUEST FOR ADDITIONAL INFORMATION NO. 6123
(SECTION 13.6.6)

Dear Sir:

Luminant Generation Company LLC (Luminant) submits herein the response to Request for Additional Information (RAI) No. 6123 (CP RAI #238) for the Combined License Application for Comanche Peak Nuclear Power Plant Units 3 and 4. The RAI response addresses implementation of the cyber security program.

Should you have any questions regarding this response, please contact Don Woodlan (254-897-6887, Donald.Woodlan@luminant.com) or me.

As a result of the response to this RAI, Luminant is withdrawing Regulatory Commitment #6591 made in letter TXNB-09058 on November 26, 2009 (ML093010366) and it will be shown as "deleted" in the Commitment Tracking System. There are no new commitments in this letter.

I state under penalty of perjury that the foregoing is true and correct.

Executed on December 12, 2011.

Sincerely,

Luminant Generation Company LLC

Rafael Flores *for*

RESPONSE TO REQUEST FOR ADDITIONAL INFORMATION

Comanche Peak, Units 3 and 4

Luminant Generation Company LLC

Docket Nos. 52-034 and 52-035

RAI NO.: 6123 (CP RAI #238)

SRP SECTION: 13.06.06 - Cyber Security (Future SRP Section)

QUESTIONS for Reactor Security Rulemaking and Licensing Branch (NSIR/DSP/RSRLB)

DATE OF RAI ISSUE: 11/8/2011

QUESTION NO.: 13.06.06-2

In its combined license application (COLA), Revision 2, FSAR, Table 13.4-201, "Operational Programs Required by NRC Regulation and Program Implementation," Luminant proposed a license condition to implement the cyber security program prior to receipt of fuel on-site in the protected area.

As discussed in SECY-05-0197, "Review of Operational Programs in a Combined License Application and Generic Emergency Planning Inspections, Tests, Analyses, and Acceptance Criteria," a COL applicant should provide schedules for implementation milestones for operational programs. The staff plans to inspect operational programs and their implementation as they are developed to ensure these programs are being implemented consistent with the COLA FSAR. As stated in SECY-05-0197, "recognizing that maintaining NRC inspection schedules will be critical to ensuring that the Commission has timely information on operational readiness," and pursuant to the requirements of 10 CFR 52.79(d)(3), the staff requests that Luminant implement the following license condition below:

No later than 12 months after issuance of the COL, the licensee shall submit to the Director of NRO a schedule that supports planning for, and the conducting of, the NRC inspection of the cyber security program implementation. The schedule shall be updated every 6 months until 12 months before scheduled fuel loading, and every month thereafter until the cyber security program has been fully implemented.

ANSWER:

Luminant has received several questions requesting similar license conditions for other operational programs. The following proposed license conditions have been added to Part 10 of the COLA to satisfy these requests.

The Licensee shall submit to the Director of NRO, a schedule, no later than 12 months after issuance of the COL or at the start of construction as defined in 10 CFR 50.10(a), whichever is later, that supports planning for and conduct of NRC inspections of operational programs listed in FSAR Table 13.4-201 with the exception of the Fitness for

Duty program. The schedule shall be updated every 6 months until 12 months before scheduled fuel loading, and every month thereafter for each applicable operational program until either the operational program has been fully implemented or the plant has been placed in commercial service, whichever comes first.

The Licensee shall submit to the Director of NRO, a schedule, no later than 12 months after issuance of the COL, that supports planning for and conduct of NRC inspections of the Fitness for Duty program listed in FSAR Table 13.4-201. The schedule shall be updated every 6 months until 12 months before scheduled fuel loading, and every month thereafter until either the Fitness for Duty program has been fully implemented or the plant has been placed in commercial service, whichever comes first.

These proposed license conditions are similar to the approach for the ITAAC schedule required in 10 CFR 52.99(a), the Model COL discussed with the NRC and DCWGs on February 26, 2011, and RG 1.206, Page C.IV.4-3. The FFD program has been singled out because parts of the program are implemented prior to commencement of construction activities.

In previous submittals Luminant created or edited Regulatory Commitment #6591 quoted below:

Luminant commits to submit a schedule to the NRC that supports the planning and conduct of NRC inspections of operational programs, including the IST program, the PSI program, the ISI program and the reactor vessel surveillance program, no later than 12 months after issuance of the COL or at the start of construction as defined in 10 CFR 50.10a, whichever is later. This is similar to the approach for the ITAAC schedule required in 10 CFR 52.99(a).

In light of this new proposed license condition, Luminant withdraws Regulatory Commitment #6591. The previous submittals were responses to RAI No. 2772 (CP RAI #57) (ML093010366), RAI No. 3193 (CP RAI #62) (ML093090163), and RAI No. 5677 (CP RAI #214) (ML1111A101).

Impact on R-COLA

See attached marked-up COLA Part 10 Revision 2 page 6.

Impact on S-COLA

None; this response is site-specific.

Impact on DCD

None.
