**Subject:** RE: NRC eRAI Database

David:

Per our discussion, the eRAI update at the question level for each section will be completed as Mike is able to review each SER to confirm that there are/are not open items. Some question may be status as resolved base on the review of the SER and discussion with the technical staff. Although I cannot provide you with a date at this time, I think it is safe to say that as you begin to get Phase B SERs for fact check and PROP review, the questions will be updated to reflect the SER – statusing each question with/without confirmatory items or resolved.

No... I said that 2.4 and 2.5 are STILL in Phase A – RAIs and Supplemental RAIs issued with the development of a Preliminary SER. The eRAI system is up-to-date and accurate. All other sections related to your review are ending Phase A if they have not already and are working on a phase B product.

Tekia – You mentioned in our status call this morning that the SSAR sections other than 2.4 and 2.5 are now in Phase B (SER with no open items). Based on this status will the NRC be updating the eRAI Safety Report database for the Victoria project? Most of the RAIs in this report still show a status of Responded rather than Resolved or Confirmatory Action (SSAR update).

Thanks.

Dave Distel
