

NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

RIN 3150-AJ05

[NRC-2011-0221]

**List of Approved Spent Fuel Storage Casks:
HI-STORM 100, Revision 8**

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC or the Commission) is proposing to amend its spent fuel storage cask regulations by revising the Holtec International HI-STORM 100 dry cask storage system listing within the “List of Approved Spent Fuel Storage Casks” to include Amendment No. 8 to Certificate of Compliance (CoC) No. 1014. Amendment No. 8 adds a new multipurpose canister (MPC) - 68M to the approved models currently included in CoC No. 1014 with two new boiling water reactor fuel assembly/array classes, and a new pressurized water reactor fuel assembly/class to CoC No. 1014 for loading into the MPC-32. In addition, the amendment changes: 1) Condition 5 of CoC No. 1014 to add “if applicable” after the reference to Section 3.5 of Appendix B, “Cask Transfer Facility (CTF)” to clarify that the CTF is an optional facility; 2) Appendix A, Technical Specification (TS) 1.1, to modify the CTF definition to clarify that it could be used in lieu of Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50 controlled structures for cask transfer evolutions; and 3) Table 3-1, MPC Cavity

Drying Limits, to include the previously approved, but omitted table to eliminate inconsistencies between Table 3-1 and TS 3.1.1, Limiting Condition for Operation.

Procedural Background

This rule is limited to the changes contained in Amendment No. 8 to CoC No. 1014 and does not include other aspects of the HI-STORM 100 dry storage cask system. Because the NRC considers this action noncontroversial and routine, the NRC is publishing this proposed rule concurrently as a direct final rule in the Rules and Regulations section of this issue of the *Federal Register*. Adequate protection of public health and safety continues to be ensured. The direct final rule will become effective on **[insert date 75 days after publication in the *Federal Register*]**. However, if the NRC receives significant adverse comments on the direct final rule by **[insert date 30 days after publication in the *Federal Register*]**, then the NRC will publish a document that withdraws the direct final rule. If the direct final rule is withdrawn, the NRC will address the comments received in response to the proposed revisions in a subsequent final rule. Absent significant modifications to the proposed revisions requiring

republication, the NRC will not initiate a second comment period on this action in the event the direct final rule is withdrawn.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, a substantive response is required when:

a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

c) The comment raises a relevant issue that was not previously addressed or considered by the NRC staff.

2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

3) The comment causes the NRC staff to make a change (other than editorial) to the rule, CoC, or TSs.

For additional procedural information and the regulatory analysis, see the direct final rule published in the Rules and Regulations section of this *Federal Register*.
