

UNITED STATES NUCLEAR REGULATORY COMMISSION WASHINGTON, D.C. 20555

February 23, 2011

The Honorable Ralph M. Hall
Chairman, House Committee on Science,
Space, and Technology
2321 Rayburn House Office Building
Washington, DC 20515-6301

Dear Congressman Hall:

Thank you for your letter dated February 10, 2011. The NRC's handling of the licensing of the High-Level Waste (HLW) repository at Yucca Mountain is of great concern to me as a Commissioner. My position has consistently been that the NRC staff should complete and publicly issue the Safety Evaluation Reports (SERs) associated with Yucca Mountain. As noted in your letter, my memos of October 6, 2010, and October 8, 2010, as well as my October 27, 2010 letter to Congressman Hastings outline my position on this matter, and those views have not changed.

In recent months, I have repeated my views to my colleagues that the Commission should direct the staff to complete and publicly issue the SERs. Yet, as an individual Commissioner I lack the legal authority to unilaterally direct any action by the NRC staff, and thus cannot alone order issuance of any SER volume or related documents. The law requires that a majority of my colleagues agree with my opinion that the Commission should take action.

Regarding your request for public release of SER Volume 3 and all documents related to the SER release, the NRC released a redacted version of SER Volumes 2 and 3 on February 17, 2011, pursuant to a FOIA request. You also requested an update on the current status of the remaining volumes of the SER. Consistent with Commission procedures, I have referred your request to the NRC's Office of Congressional Affairs to provide you with a copy of a February 4, 2011 memorandum to the Commission from the Director of the Office of Nuclear Materials Safety and Safeguards titled "Update on the Yucca Mountain Program." This document provides a more complete description of the status of the SER volumes.

I am available to respond to any further inquiries you may have on this matter.

Sincerely,

William C. Ostendorff

NUCLEAR REGULATORY COMMISSION WASHINGTON, D.C. 20555

November 1, 2010

The Honorable Doc Hastings
Ranking Member, Committee on
Natural Resources
United States House of Representatives
Washington, D.C. 20515

Dear Congressman Hastings:

I write in response to your letter of October 21, 2010, regarding Volume III of NRC's Yucca Mountain Safety Evaluation Report (SER).

As you are aware, subsequent to the decision by NRC Chairman Gregory Jaczko to direct the orderly closure of NRC's High Level Waste program, Commissioner William Ostendorff formally proposed that the Commission revisit the Chairman's direction, including the issuance of explicit Commission direction to the NRC staff that it continue towards its release of Volume III of the

Although a majority of Commissioners declined to participate, denying a quorum required for action on his proposal, I voted in support of Commissioner Ostendorff's request. A copy of my vote is enclosed with this letter. In it, I state that "whatever the ultimate disposition of the Yucca Mountain license application and associated activities, complete SER documents should be a matter of public record and will be the best vehicle to memorialize the scientific knowledge and analysis gained during the technical review."

I do not have access to Volume III of the SER, and would receive it upon its public release, but I understand that your request to be provided a copy of it has been referred to the NRC's Office of Congressional Affairs. I thank you for the opportunity to provide my individual view in this

Respectfully,

Kristine L. Svinicki

Enclosure: Vote for COMWCO-10-0002

RESPONSE SHEET

TO:	Annette Vietti-Cook, Secretary
FROM:	COMMISSIONER SVINICKI
SUBJECT:	COMWCO-10-0002 – COMMISSION DIRECTION ON STAFF BUDGET GUIDANCE UNDER FISCAL YEAR (FY) 2011 CONTINUING RESOLUTION
Approved XX	Disapproved Abstain
Not Participating	
COMMENTS:	Below Attached XX None

Commissioner Svinicki's Comments on COMWCO-10-0002 Commission Direction on Staff Budget Guidance Under Fiscal Year 2011 Continuing Resolution

I approve Commissioner Ostendorff's proposal, contained in COMWCO-10-0002, that during the pendency of the Fiscal Year 2011 Continuing Resolution, the staff continue to follow its schedule for completing and issuing the Safety Evaluation Report (SER) volumes and further, that the staff continue to work on any remaining SER volumes until fiscal year 2010 funds are exhausted. I agree that, whatever the ultimate disposition of the Yucca Mountain license application and associated activities, complete SER documents should be a matter of public record and will be the best vehicle to memorialize the scientific knowledge and analysis gained during the technical review. Consequently, the staff should continue to work on and issue the remaining SER volumes according to its stated schedule, at the rate for operations appropriate given the proposed fiscal year 2011 budget, as augmented by prior year high-level waste (HLW) carryover funds and fiscal year 2010 reprogrammed HLW funds remaining from fiscal year 2010 appropriations.

I fundamentally disagree with the direction contained in the October 4, 2010 memorandum, issued by the Executive Director for Operations and Chief Financial Officer, instructing Staff to follow the Commission's fiscal year 2011 budget direction for carrying out HLW review activities during the continuing resolution. I find this directive inconsistent with the intent of the Continuing Resolution. Section 101 of the Fiscal Year 2011 Continuing Resolution provides that the funds to be appropriated are those "as provided in the applicable appropriations Act for fiscal year 2010 and under the authority and conditions provided in such Acts, for continuing projects or activities . . . that are not otherwise specifically provided for in this Act." Since the Continuing Resolution does not specifically provide for the NRC to follow its fiscal year 2011 budget request, nor does it provide specific limitations on the use of HLW funds, the NRC should continue to carry out the Yucca Mountain review activities in accordance with its fiscal year 2010 budget to "support the ongoing license review by funding the NRC staff conducting technical license application review activities."

In contrast, the fiscal year 2011 budget request – which is currently sitting before Congress – describes the "orderly closure" of technical review activities, including knowledge capture and management, and archiving of material. But this is not all that the fiscal year 2011 budget states with respect to the HLW program. It also explains that "orderly closure" activities are conditioned upon certain events taking place first: "Upon withdrawal or suspension of the licensing review, the NRC would begin an orderly closure..." Neither of these events has occurred, and commencing closure activities now is contrary to the Commission's express direction. Therefore, my view on the appropriate scope of activities under the continuing resolution is further fortified by the fact that the conditions for transitioning to orderly closure of the review have not been met.

Furthermore, at the time of the Commission's deliberations on the fiscal year 2011 budget proposal, the Administration was contemplating options for the Yucca Mountain license application and the Department of Energy (DOE) had not submitted its motion to withdraw. My approval of the fiscal year 2011 budget proposal was predicated on continuing the technical review of the application, while recognizing that the NRC's ability to do so was influenced by other imponderables, such as DOE's ability to support the review. The "fog of war" environment that clouded the future of the Yucca Mountain license application could not, and did not, anticipate with any precision the circumstances that the NRC faces today.

Ultimately, I agree that this is a significant policy matter warranting Commission deliberation and action. In my opinion, we would have been better served had the CR guidance memorandum, at the very least, requested Commission direction on the use of Nuclear Waste Fund resources during the continuing resolution. Absent that request, however, I support fully Commissioner Ostendorff's proposal.

Kristine L. Svinicki

options, and there's actually some initiative that is underway at the Department of Energy to provide grants to look for solutions. Right now, there's a combination of things that are going on, including trying to convert some of the existing research reactors at universities to produce medical isotopes, but there are also industry initiatives underway to develop new reactor-based technologies, and actually some non-reactor technologies to develop, particularly, molybdenum-99. But all these things are still in the pipeline. There's nothing that really solves the problem in the near term.

That said, I think that it's something that has finally reached -- gained the kind of attention nationally that it's deserved for a long time. For some of us who were involved in this years ago, it was always very frustrating that we were sort of voices in the dark saying there's a big problem coming down the line here. But now I think it's got a lot of attention. There's resources, so, hopefully, as we go forward in the next several years, there'll be some solutions, as well.

AUDIENCE PARTICIPANT: Thank you. For more than a decade, previous Commissions have provided resources and supported the High-Level Waste program as it developed and elaborated a Public Outreach program to interact with stakeholders. And key to that effort was to communicate a message that NRC was an open, and transparent, and independent regulator. And, as part of that, a key message was that the public and stakeholders would have access to the scientific and technical work that staff would do in evaluating a license application for a proposed repository at Yucca Mountain when it was received.

I am troubled by the fact that with the recent Commission

decision, we are breaking faith with that promise that we made to stakeholders, many of whom are taxpayers and rate payers, who paid for our work, and that they will not have access to the findings, the technical findings that staff has made, and that are ready to be released as Volume Ill of that work. And I would ask the Commission here today what we should say to those stakeholders, and rate payers, and taxpayers when they ask why can't they have access to that work; understanding that it is not complete, is not part of a final hearing process decision. They understand that, because we spent so much time explaining the hearing process, and explaining what a final decision would have to represent Thank you.

CHAIRMAN JACZKO: Well, I can begin. Of course, if anyone wants to add, feel free.

I think as we embark on the effort to look at closing out the program, I think that's an effort that will take some degree of time. suspect that as we begin to look at the kinds of things that we will make public, and I do believe, as I've talked to many of the staff who work in NMSS, that we should make a lot of information public, and that involves a good degree of the technical information, and the technical review work that the staff has undertaken and completed.

I think, my personal views are that there is probably certain information which, at this point, is not complete, and wouldn't be appropriate for publication as part of some kind of information provision, or information document. But, again, I think some of those issues, where that line is, what is exactly the things that shouldn't be provided, and what should be provided, I think that's something that will be more fleshed out in the coming months as the staff begins to look at what, exactly, is entailed

in the closeout procedure.

So, I think there's - the bulk of the information will be made public, and I think that's a good thing. I think it's appropriate for people to know the work that we've done as an agency. And I think that that will bear itself out in the future.

AUDIENCE PARTICIPANT: When will that be, sir?

CHAIRMAN JACZKO: I'm sorry? When?

AUDIENCE PARTICIPANT: When will that be, sir?

CHAIRMAN JACZKO: Well, I think over the next couple of months we'll be looking at putting together a time line for all the work that needs to be done to do the closeout.

AUDIENCE PARTICIPANT: Thank you.

Commissioner Ostendorff's COM. I indicated my personal view that the best way to memorialize the staff's work would be to publish Volume III of the SER with the findings, so I — it's my hope that as the Commission looks more closely at the staff's recommendation on the appropriate scope of closeout activities, as the Chairman has mentioned, I hope that we'll continue to analyze this particular question. That's my personal view.

AUDIENCE PARTICIPANT: In your opinion, what is the biggest non-technical threat to the nuclear renaissance, some examples being politics, economy, and workforce issues.

CHAIRMAN JACZKO: Well, I'll share my opinion first.

Then, of course, any others like to chime in. And, again, these questions are always difficult, because it's very tempting to want to get in the middle.

UNITED STATES OF AMERICA NUCLEAR REGULATORY COMMISSION

ATOMIC SAFETY AND LICENSING BOARD

Before Administrative Judges:

Thomas S. Moore, Chairman Paul S. Ryerson Richard E. Wardwell

In the Matter of

U.S. DEPARTMENT OF ENERGY

(High Level Waste Repository)

Docket No. 63-001-HLW

ASLBP No. 09-892-HLW-CAB04

February 25, 2011

ORDER (Directing NRC Staff's Show Cause)

On February 17, 2011, the NRC Staff filed a notification stating that, on that same date in response to a Freedom of Information Act request, it had "made available redacted copies of preliminary drafts of Volumes 2 and 3 of the SER." Previously, the Staff notified the Board on the penultimate day of the Staff's schedule for issuing Volume 3 of the SER, that it would not meet its longstanding schedule and on December 8, 2010, the Board directed the Staff to provide an explanation of its last minute schedule change.²

Nothing in the Staff's December 22, 2010 purported explanation for its last minute schedule change, or in the various documents the Staff quotes and cites therein, sheds light on how SER Volume 3, on the day before it was long scheduled to be issued, comports with the Staff's characterization of SER Volume 3 being a preliminary draft. Accordingly, the Staff shall, by March 3, 2011, show cause why the Staff should not be ordered to place, in unredacted form

conference that the Staff's schedule for issuing SER Volume 3 had slipped from September 2010 to November 2010, a date the Staff confirmed at the June 4, 2010 case management conference. The Staff had initially established the September 2010 issuance date for SER Volume 3 in its July 10, 2000 file.

¹ NRC Staff Notification of Disclosure Pursuant to Freedom of Information Act (Feb. 17, 2011).

² <u>See</u> CAB Order (Addressing Nevada's Motion and Discovery Status) (Dec. 8, 2010) at 2 (unpublished). In that order, the Board noted that the Staff had informed the Board at the January 27, 2010 case management conference that the Staff's schedule for issuing SER Volume 3 had slipped from

except for classified and safeguards information, Volume 3 of the SER in its LSN document collection as circulated draft documentary material in accordance with 10 C.F.R. § 2.1001 and its continuing obligation to "make a diligent good faith effort to include all aftercreated . . . documents as promptly as possible in each monthly supplementation of documentary material."³

It is so ORDERED.
