**TO: US NUCLEAR REGULATORY COMMISSION**  
**FROM: Harold J. and Rebecca L. Burch**  
**Landowners – Oshoto, Wyoming**  
**DATE: January 17, 2012**  
**RE: Support For Strata Energy, Inc. Oshoto Project**

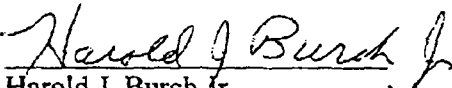

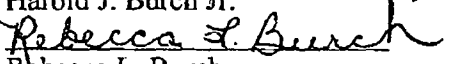

To Whom It May Concern:

We are writing to you to communicate our **strong support for the Strata Energy, Inc's uranium project near Oshoto, Wyoming.** We, Harold J. and Rebecca L. Burch, are landowners/stakeholders in the project. **We strongly support your acceptance of their recently filed license application.** Our property begins approximately 1 mile from the proposed project site and we are a part of the exploration phase of the project. We are very familiar with Strata Energy, Inc.'s proposed project and intentions, including the manner in which uranium will be recovered from the project site and the potential risks and benefits associated with the recovery of uranium at the Strata site. Having an In-Situ Uranium plant in the area is not a new concept to us. I, Rebecca L. Burch, was a secretary for Nuclear Dynamics in the 1970's and that experience helps us understand Strata's proposed project. We are aware of no adverse effects of the old plant. We are confident that Strata Energy, Inc. intends to fully comply with the even more stringent regulations required today to insure the safety and success of the project.

**It is our opinion that the Strata Energy, Inc. proposed project in the Oshoto area should move forward and that NRC should grant Strata Energy, Inc. a license to operate its project. We believe that any potential risks associated with this project are not a threat to local citizens or their natural resources.** Strata Energy, Inc. has adequately communicated with us and sufficiently shown us that their project will not contaminate or diminish our water supply. They have already proven that surface damages will be restored. They have proven that they will deal fairly throughout the area with the landowners. We have attended a number of very informative public meetings held by Strata Energy, Inc. We are aware of the current litigation ongoing with the NRC and the Powder River Basin Resource Council/Natural Resources Defense Council, and we believe their objections do not provide any basis to believe that Strata's project cannot be operated safely.

**We also believe that Strata's project will provide economic benefits to the local area where we live and we are very supportive of this product eventually becoming an energy source in the United States.** We appreciate the opportunity to submit this statement. We will continue to follow the ongoing review of Strata Energy, Inc.'s license application. Thank you for your time and consideration in this matter.

Sincerely,

  
Harold J. Burch Jr.  
  
Rebecca L. Burch
