Date: Wednesday, July 06, 2011 8:20:34 AM

Linda –

The daily event status report for Wednesday July 6. The river level has come down again (1006' 1"). I heard on the radio this morning that highway 30 across the river at Blair will be closed starting today for additional sandbagging. They expect it to reopen on Friday July 8.

Thank you and have a great day.

Tom.

Fort Calhoun Flooding Status (changes from yesterday's report are in **bold**)

1. Reactor Status: Shutdown
2. Reactor is covered with > 23-ft of cooling water
3. Offsite power and Emergency Diesel Generators are available. Both vital buses are energized at this time.
4. Spent Fuel Pooling cooling is in service and protected.
5. Shutdown cooling is in service and protected
6. **Current river level is 1006' 1" at Fort Calhoun Station (stable over last 24 hours).**
7. **Current Blair gauge level is 31.97 ft., which is a slightly lower in the last 24 hours. NWS/USACE predictions are for a stable river level over the next 4 days.**
8. The site has implemented procedures to protect power supplies and vital equipment. Water is onsite, and flood barriers are protecting vital equipment.
9. No release of radioactivity has occurred.
10. Fort Calhoun has declared a Notification of Unusual Event at 08:00 6/6/11.
11. Backup evacuation route onsite is inundated however the primary route onsite is passable and not expected to be affected.
12. **Total sirens affected/disabled = 10**. Power has been removed from siren **257** and **260** in Pottawattamie Co. IA, which is just on the edge of the 10-mile EPZ south east of the plant. Siren **75, 76** in Desoto National Wildlife Refuge have no power. Currently the refuge is closed due to flooding. Siren **1** east of Fort Calhoun on county road 34 between Fort Calhoun and Boyer Chute Recreational Area is without power. This area is closed due to flooding. Power was removed to one additional siren in Washington County – sirens **69** was removed from service due to flooding and may require route alerting for any non-evacuated residents. Power was removed from Siren **259**. This siren is located in Pottawattamie County on DeSoto Trail, west of 110th street. Counties to verify evacuation route alerting capability if needed. Power has been removed from sirens **143** and **144** in Pottawattamie Co. IA due to flooding. This area has been evacuated. **Power has been removed from Siren 135 (located on Hiway 30, approximately 1 miles east of NE/IA border). This area is not occupied.**

13. The Reception and Care Center in Fremont is now official, replacing Bellevue. This has been planned for quite some time, but also provides us with greater protection for the public, as no evacuation routes to that location are affected at this time.
14. At this time no known major evacuation routes are affected without contingency actions planned. Interstate 29 in both directions: from Exit 54A (G Avenue) to Exit 71 (I-680 exit): I-680 road closed to traffic because of flooding. I-680 is closed in both directions: from before Exit 1 130th Street to Exit 62: I-29; Old Mormon Bridge Road --- road closed because of flooding. **Highway 30 from Blair to Missouri Valley will be closed this morning to continue flood barrier work, but does not impact evacuation routes, and is scheduled to be reopened on Friday**.

Requested Information from states and counties.

1. When offsite evacuation routes are affected please contact emergency planning.
2. When the Blair Water plant is affected please contact emergency planning.
3. Authorized power outages that affect or could affect siren operability, please contact emergency planning.

The river flow rate and level have been relatively constant at Blair NE. The Corp of Engineers is releasing Gavin's Point dam at **160,300** cubic feet per second (cfs).
