Here's the other one. Note that there are two documents in this file: a memo from two commissioners and comments from Chairman Kline.

The staff has proposed via Chairman memo, updating the MACCS economic and land contamination model and that it would probably not be used for SOARCA because it will not be ready in time. The Commission seems to be O.K. with updating the model. However, there seems to be discussions ongoing regarding use of the new model for SOARCA and whether to have the same model for RDDs.

Hi Debbie,

Follow-up on Jason's e-mail, I don't think you have access to the SOARCA Sharepoint site. See attached. I think this is the document Rickie is referencing in regards to economic / land contamination modeling in MACCS

Terry
