As a Duke customer and North Carolina resident taxpayer, I urge you to turn down the proposed W. S. Lee nuclear plant near Gaffney, South Carolina. The reactor is not needed nor cost effective. Its design is questionable and presents risks to water, air, the surrounding land and human health. The public demands alternative energy that is guaranteed safe. Please try looking at the sun and wind and cease digging underneath the ground and mixing up unpredictable chemicals. Thank you for accepting my comments.
