Delegation of Authority

Memo To: Radiation Safety Officer
From: Chief Executive Officer
Subject: Delegation of Authority

You, DR JOHN KALABAT, have been appointed Radiation Safety Officer and are responsible for ensuring the safe use of radiation. You are responsible for managing the radiation protection program; identifying radiation protection problems; initiating, recommending, or providing corrective actions; verifying implementation of corrective actions; stopping unsafe activities; and ensuring compliance with regulations. You are hereby delegated the authority necessary to meet those responsibilities, including prohibiting the use of byproduct material by employees who do not meet the necessary requirements and shutting down operations where justified by radiation safety. You are required to notify management if staff do not cooperate and do not address radiation safety issues. In addition, you are free to raise issues with the NRC.

I accept the above responsibilities,

Re: Amendment to NRC License# 21-26338-01

Dear Sir /Madam:

The purpose of this letter is to amend our current NRC license to reflect the following change. We are requesting to add John Kalabat, MD to the Authorized User List.

We appreciate your assistance with this. If you have any questions or require additional information, please contact us at 586-226-6226.

Respectfully,

A handwritten signature in cursive script, appearing to read "Phil Hunsberger".

SUMMARY

We have reviewed your requesting license amendment request dated October 21, 2011, and find that we are unable to continue this action until we have received information regarding the following:

- Under 10 CFR 30.9, information submitted to the NRC shall be complete and accurate in all material respects. The NRC Form 313A (RSO) submitted for John Kalabat, M.D., indicates that Dr. Kalabat received 260 hours of classroom and laboratory training at St. John Hospital, 22101 Morross, Detroit, Michigan, between October 2004 and October 2011. Under 10 CFR 35.50, the requirement for 200 hours of classroom and laboratory training must be completed via a structured educational program. In addition, additional information provided to the NRC via facsimile on December 11, 2011, indicates that Dr. Kalabat was approved as an Authorized User at another facility in September 2004.

Based on the documents provided, information supporting Dr. Kalabat's Radiation Safety Officer (RSO) training and experience is incomplete. Accordingly, the submitted information is insufficient to list Dr. Kalabat as RSO for the Romeo Plank Diagnostic Center license, NRC license number 21-26338-01.

Romeo Plank Diagnostic Center has three paths by which to proceed in listing a new RSO on NRC license number 21-26338-01:

AUTHORIZED USER PATHWAY FOR JOHN KALABAT, M.D.

- Under 10 CFR 30.50(c)(2), Dr. Kalabat may be added as an RSO if he is listed on the Romeo Plank Diagnostic Center NRC license number 21-26338-01. However Dr. Kalabat is not currently listed as an Authorized User on the referenced license. To add Dr. Kalabat as an AU, submit a written request to do so, signed and dated by management;

R. Carlson, Lic. No. 21-26368-01

p. 2 of 2

STRUCTURED EDUCATIONAL PATHWAY FOR JOHN KALABAT, M.D.

b. Under 10 CFR 30.50(b)(1), Dr. Kalabat may be added as an RSO if complete and accurate documentation regarding his completion of a structured educational program is submitted in writing.

To continue with the structured educational pathway for John Kalabat, M.D., submit a detailed outline of his classroom and laboratory training, including a description of the structured program and exact dates on which the required training was received.

EXPERIENCED RSO PATHWAY

c. An experienced RSO may be listed as the RSO on the Romeo Plank Diagnostic Center NRC license number 21-26338-01. To qualify as an experienced RSO, the RSO must be listed as RSO on a license authorizing the same medical uses as listed on the Romeo Plank Diagnostic Center license.

To qualify under this pathway, submit a written request to add a qualifying RSO, signed and dated by management. The request should include the name of a Radiation Safety Officer currently listed on another license, and indicate the reference license number.

2. Under 10 CFR 35.24, a licensee's management shall appoint a Radiation Safety Officer in writing. Please provide a current, signed RSO Memorandum of Understanding/Delegation of Authority, which conforms to the requirements specified in 10 CFR 35.24(b) and 10 CFR 35.24(e). No such written statement was included with the renewal application.

Please provide a signed statement for the RSO selected as indicated above.

We have requested that you submit the referenced items --

- Adequate RSO qualifications (select 1 of the 3 options presented above.)
- RSO/Management MOU/DOA document

-- via facsimile, to (630) 515-1078.

Please reference the Control No. 576300, as listed at the top of this memo.

For future reference, please always include the name, phone number and fax number of at least one person whom we may contact for additional information when reviewing your licensing correspondence and requests.

Please submit the requested information within 2 days of this record. Include reference control number 576300. Please FAX your response to my attention at (630) 515-1078. You may also scan your response and send to me via email, as a pdf file.

Please direct any questions you have to me at (630) 829-9892 or sara.forster@nrc.gov.
