To All,

Below are the comments listed on <http://www.regulations.gov> to date.

### **Comment (1) of Donna Budnick on FR Doc # 2011-32909**

It is my understanding that TVA's nuclear power plants cannot withstand a 7 or great earthquake. Please rethink continuing to build/refurbish such a power plant until such time as one can be built to withstand a severe earthquake. Watts Bar is not so very far away from the New Madrid fault line.

### **Comment (2) of Joyce Stanley on Behalf of the U.S. Department of the Interior on Draft Supplement 2 to the Final Environmental Impact Statement Related to the Operation of Watts Bar Unit 2**
