Subject: Comments on the Draft Environmental impact Statement for the Proposed International Isotopes Fluorine Products Facility in Lea County, New Mexico
(NRC Docket ID# NRC-40-9086)

Dear Ms. Bladey,

The purpose of this letter is to provide you with my comments on the proposed International Isotopes fluorine products facility in Lea County, New Mexico. I support this project and believe that it will be a positive contribution to Lea County and will fulfill an important role in the safe and environmentally sound treatment of depleted uranium hexafluoride. I also believe the facility will produce important fluoride products for U.S. markets and be an asset to U.S. chemical manufacturing capability. I believe the draft Environmental impact Statement thoroughly reviews all of the potential environmental impacts from the proposed facility and I agree with the conclusions reached by the NRC staff that those impacts would be small.

Sincerely,

Mrs. Erika Prestwich
