Jenny,

The license amendment you have in your possession did authorize GE Vallecitos to reuse, recycle, test and long term store 215,000 Ci of Co-60.

Thanks

Gonzalo Perez  
Chief, RHB

Jenny,

On 11/15/11, we issued amendment 72 to LN0017, GE-Hitachi. You have a copy of this amendment so you see the authorizations provided by the license. So, we can close out this issue. I briefed Gonzalo Perez, our new Branch Chief, on the issue. We are not familiar with the details of the NRC import application. If you have any other questions, please call Gonzalo at 916-440-7942.

Ron

**Subject:** IW-030 Request Please

Dear Ron,

I apologize for bringing up an old conversation on the import of disused sources from China for disposition at GE's Vallecitos Center under the CA license. I've attached an email of a summary of our three-way conference call (NRC, GE, and CA) to help refresh your memory.

I was requested to secure an email from you for our license file concerning the State of California's view on the amended GE possession license with respect to the requests in the import application (namely the reuse, recycle, testing and long-term storage for 7955 TBq (215000 Ci)).

I will look forward to your response as we are ready to issue this license if/when favorable views from you are obtained. Please let me know if you have questions.

Thank you in advance!  
-Jenny

Thank you for the fast response!

Listing Donald Krause is fine. He should get the original and an e-mail copy to me would be great.

I appreciate your input on the intern program at the NRC. Kim is going to check on it.

Have another question that has come up that I will be sending by separate e-mail.

Thanks,

Brenda

Brenda,  
It was lovely meeting you today as well ☺

An export of 4 microcuries to India would fall under the general license in 110.23.

One quick follow-up on the brief discussion we had on your IW030 case...if the import/export records are being kept at the CA facility and they are listed as importing facility on the draft license, I've just been informed that the contact point for the importing facility should be on that site. For your case, it would entail Donald Krause being listed as the contact instead of yourself, is that ok with you?

I hope you get to see some of the sights this afternoon/evening with your daughter and drive home safely. Feel free to ask me follow-up questions (on the case as well as employment opportunities here!)

Take care,  
Jenny

**Subject:** Quick export question  
**Importance:** High

It was wonderful meeting the two of you in person today.

My manager just called me and asked if a shipment of Krypton 85 of 4 micro curries could be exported to India. Is this something that we could do under an export license?

Brenda
