Comment:

I wish to refute the conclusion that this power station ~~is~~ is a good idea.

(1) There are lots of green house emissions involved in the mining & transportation of uranium, as well as the building of the plant.

(2) The Broad River is not strong enough to support this station, especially in view of coming drought.

(3) Conservation alone ~~cannot~~ eliminate the "need" for more electricity.

(4) There is NO SAFE DISPOSAL!! of waste

Please wake up, take a strong stance, and tell the TRUTH.

Patricia Allison
