Evening

Comment:

I would like to draw your attention to the most recent data from Chernobyl Russia. The so called 10 mile and 50 mile risk area around nuclear power plants does not hold true to the people and children of Belarus, victims of the 1986 Chernobyl fallout ~~area~~ who are still suffering debilitating diseases as a result of the contamination from 124 miles away.

Check out why Germany and Japan have said NO to this continued Nuclear madness.

Sincerely,

Michaeljon Drowin
