RE: Docket ID NRC-2010-0143

Dear Ms. Bladey -

I write in unequivocal support of the proposed International Isotopes fluorine products facility in Lea County, New Mexico. I speak for the membership and the board of directors of the Hobbs Chamber of Commerce. We collectively and enthusiastically support the broadening base of Lea County's nuclear industry, which complements the established energy base of our communities.

International Isotopes has already proven itself to be a good corporate citizen of Lea County, and we support this venture with full confidence in the company's commitment to safety and environmental stewardship during the treatment of depleted uranium hexafluoride. The resulting products will fill an important market niche for fluoride products across the country and around the world, while simultaneously creating a new center for U.S. chemical manufacturing.

This proposed project has been thoroughly vetted and reviewed, and the Hobbs Chamber of Commerce concurs with the draft Environmental Impact Statement in regards to the minimal impacts anticipated in the MRC's staff conclusions.

Please know that this project has the full support of the Hobbs Chamber of Commerce. If I can answer any additional questions or address any outstanding concerns, I'd be happy to do so. I can be reached at (575) 397-3202.

Sincerely,

Grant A. Taylor, President and CEO
Hobbs Chamber of Commerce
