

## NOTICE OF VIOLATION

CRMI  
San Juan, PR

Docket No. 03034704  
License No. 52-25430-01

During an NRC inspection conducted on January 4-5, 2012, and in-office reviews of additional information provided in correspondence dated January 11 and 17, 2012, for which a telephonic exit meeting was conducted on February 3, 2012, one violation of NRC requirements was identified. In accordance with the NRC Enforcement Policy, the violation is listed below:

10 CFR 30.41(c) requires, in part, that before transferring byproduct material to a specific licensee, the licensee transferring the material shall verify that the transferee's license authorizes the receipt of the type, form, and quantity of byproduct material to be transferred.

Contrary to the above, on October 13, 2010, CRMI did not verify before transferring byproduct material that the transferee's license authorized the receipt of the type, form, and quantity of byproduct material to be transferred. Specifically, CRMI transferred two Troxler Model 3400 Series portable nuclear gauges to Antillean Engineers, Inc. (AEI) and did not verify that AEI's license authorized receipt of these types of gauges.

This is a Severity Level IV violation (Supplement 6.3).

Pursuant to the provisions of 10 CFR 2.201, CRMI is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555, with a copy to the Regional Administrator, Region I, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

If you contest this enforcement action, you should also provide a copy of your response to the Director, Office of Enforcement, United States Nuclear Regulatory Commission, Washington, DC 20555-0001. Under the authority of Section 182 of the Act, 42 U.S.C. 2232, any response which contests an enforcement action shall be submitted under oath or affirmation.

Your response will be placed in the NRC Public Document Room (PDR) and on the NRC Web site. To the extent possible, it should, therefore, not include any personal privacy, proprietary, or safeguards information so that it can be made publically available without redaction. However, if you find it necessary to include such information, you should clearly indicate the specific information that you desire not to be placed in the PDR, and provide the legal basis to support your request for withholding the information from the public.

In accordance with 10 CFR 19.11, you may be required to post this Notice within two working days of receipt.

Dated This 3rd day of February 2012
