Thanks, Yong.

Cliff, Annie and I have the following information requests, to the extent you are able to get these:

While you are there, if you are able to get photographs of the seismic instruments, and note what elevation each instrument is on, that would be helpful. If you cannot get photos, please note the foundation and anchoring of the instruments. Also, if there is any damage noted, photographs of the damage with a note of the location of the damage. Obviously, any information of actual measurements from the instruments, though it sounded like that we may need to wait until their vendor's analysis is done in California. Also, if you are able to get a copy of whatever procedure they are using to evaluate the plant and the process they are using for that. It would be useful to know if they intend to do work beyond the visible inspections. Also, it would be useful to understand what kinds of comparative analyses they intend to perform.

**Subject:** Visit to North Anna

Hi, Cliff, Annie and Jon,

George Thomas and I will be at the North Anna NPP tomorrow to cooperate with Region II staff to do a post earthquake visit to the plant.

If you have any particular information(or data) you are interested and questions you would like to ask, please let me know so we will do our best to get those from the licensee.

Thanks !

Yong
