Thanks Chris. I would like to touch a little on the North Anna AIT to help me decide whether we need to open an IFR and request your group's support if we do.

Tim,
Thanks and I glad this isn't going to be a problem.

Al,
See you at 10:30 to discuss the GAO questions.

Chris

Chris

No problems. I probably misunderstood Al's original email when he stated

"During the OpE clearinghouse meeting yesterday, I was asked if NRO is interested in participating in the North Anna AIT"

It sounded like we were still trying to staff up the AIT. Sounds like we are well past that. Participating in status calls is up to you guys

E/33 (12)

I will call in today to the NA AIT.

Tim... please give me a call if this will cause you heartburn. Yong Li, who's in my branch but on rotation to NRR/DE, is part of the AIT as the lead seismologist. Becky & my participation in the calls will just expedite communication that's already occurring. My plan is to only listen.

Cliff Munson and I will call in (possibly not today, though, as NRR has scheduled another North Anna meeting for us at 3pm).

AI

The decision for NRO participation in an AIT probably occurs at the Office Director level. I don't think that we can be making such a decision at our level. Participation in NRR OpE followup tasks is different, and can be coordinated between you and Chris

Alfred,
Yes, we are interested and I'm free at 10:30. Let's meet in T-7D03 (my office).
Chris

Hello Mr. Cook,

During the OpE clearinghouse meeting yesterday, I was asked if NRO is interested in participating in the North Anna AIT. My understanding is that the plant exceeded its design basis acceleration level at 5 HZ during the recent earthquake. This relates to the GAO question related to geo-science issues that we plan to discuss. Your group is probably best suited to participate if you think that the lessons learned have the potential to impact new reactors. In addition, if interested, NRO can participate in the AIT daily debriefs as detailed below. Per LIC-401, an AIT results in an Issue For Resolution (IFR) for OpE and we, in ConE, have the option to either participate in the resolution of their IFR or to initiate our own IFR. We would need your group's input to make that decision. I would like to add this topic to the GAO question discussion when we meet today. Your calendar shows that you're available from 10-12. I was hoping to meet at 10:30. Please let me know if you would be available.

Thank you

Al,

If someone from NRO wants to participate in the daily debrief phone call, here is the information. Please make sure that Gerry McCoy knows if someone is going to call in.
