**Subject:** North Anna

Gloria Kulesa, Bob Martin, and I just had a discussion with Dominion Licensing Manager, Dave Sommers, in their corporate office regarding North Anna after the earthquake.

An Alert was declared at North Anna, and an Unusual Event at Surry.

At North Anna, there was a dual unit trip due to loss of offsite power. Diesel generators started and aux feedwater is running, dumping to atmosphere.

At North Anna, they staffed Emergency Response Center, and focus on site is accountability of site staff and verifying plant equipment status and availability.

A number of other plants in Regions I and II have declared UEs, including DC Cook in Region III (incomplete list - around a dozen overall).
