Subject: FW: Request: Public Availability of SECYs and SRMS concerning SOARCA

FYI EDO forwarded this email and asked if we were working on it and I noted that we were. Originally we were told we would get a green ticket but I am not sure we will..do you want one or a YT?
thanks

Kathleen,

Thanks for the response, list of documents, and status. The recommended target date to release the documents or redacted documents is fine with the Chairman's office.

Michael L. Marshall, Jr.
Policy Advisor for Reactors
Office of the Chairman
U.S. Nuclear Regulatory Commission

Good Morning,

Attached is a compilation of documents (SECYs and SRMS) The Office of Research recommends for consideration in response to your query. The attachment also lists documents that are currently public.

It is estimated that it will take approximately 30 staff-hours to accomplish the detailed review, appropriate redaction and release of the listed documents.

A recommended due date is April 16th, 2010. Please note that the staff has taken no further action at this time.

Please let me know if you have any questions or require additional information.

Kathleen O'Donohue
OEDO/ETA (rotational) OE,OI, RES

Subject: Request: Public Availability of SECYs and SRMS concerning SOARCA

Hello Kathleen,

The chairman would like to make all the SECYs and SRMs concerning SOARCA available to the public, even if portions of the documents would need to be redacted.

Please, provide the Chairman a recommendation of:

- (1) Which SECYs and SRMs concerning SOARCA that are not currently publicly available that can be released to the public and
- (2) What portions of the other SECYs and SRMs concerning SOARCA that are not currently available that would need to be redacted to enable their release to the public.

After this request has been considered, please, provide an estimated date by which this request will be completed. Thanks in advance for your assistance.

Michael L. Marshall, Jr.
Policy Advisor for Reactors

Ok thanks. We need to align with Jennifer and Brian on what our recommendation will be for public release for each of the documents - release, release with redaction, do not release.

No. Charlie, Scott and I are meeting with the OEDO staff to go over the SOARCA document redaction effort.
