Talked to Trent, it's been resolved. The shorter version below will be included in today's notes.

~~Official Use Only - Sensitive Internal Information~~

On August 25, the staff submitted an International Nuclear and Radiological Event Scale (INES) provisional rating of Level 0 to the IAEA in regards to the August 23 loss of offsite power event and Alert declaration at the North Anna Power Station. Per MD 5.12, this submission is in response to international requests for information on the impact of the earthquake on Eastern U.S. nuclear plants. This rating is being submitted on a provisional basis; a final rating will be submitted once further information is available.

~~Official Use Only - Sensitive Internal Information~~

Oh well. Dave Garmon will work with Trent Wertz today to get this shortened and re-submitted. If Trent is not in, maybe Dave and the acting BC today, Rebecca Sigmon can work with you?

Thanks,

John

Sorry. I submitted it, but it exceeded the permitted word count. I started to see if I could shorten it, and was just about to resubmit when I saw that the Daily Notes were issued. Will have to go tomorrow.
