Hi Bob

Attached is the CPTB input/update to the North Anna 1 & 2 Restart – 2<sup>nd</sup> set of RAIs.

If you need any additional information please let me know.

Thank you

**Subject:** NA RESTART - 2nd set of RAIs

Attached is the second set of RAIs that you provided in response to our request from last week. Hope I didn't miss anyone.

Please provide the requested acronymns and document titles where noted in the RAIs.

Also, please review the attached report from VEPCO and determine whether you still wish to send these RAIs out. If there is doubt or if it will take awhile to determine this, we should probably go ahead and send them out. If the questions aren't completely answered in the VEPCO report, the value of VEPCO having them asap is considerable. If its an issue where they clearly provide the answer in their Sept 17 report, then so indicate and we can remove the question.

We expect that the review of the VEPCO report to support our safety evaluation will necessitate further requests for information.
