Dennis,

It is currently Luminant's intent to reconcile the Comanche Peak design with the updated standard plant model and analyses. I believe this is what Mr. Valentin is referring to when he says "reconciliation analysis." This is a key part of the Integrated Seismic Closure Plan (ISCP) which we intend to provide by 4/16/12. The plan is intended to address the technical methodology and approach for reconciliation including how we intend to address the SASSI subtraction methodology if used. There is a possibility that the plan will not include the use of the subtraction method but we do not currently know that for sure. If used, we will discuss how and when we intend to produce a sensitivity study. As you know, we intend to request a public meeting in the May 2012 time frame to discuss these details with the reviewers.

Donald R. Woodlan

Dennis, let me check with the technical staff and I will get back with you soon. As Milton noted, this will be part of the Seismic Closure Plan scheduled for 4/16/12 but maybe I can give you some advance feedback.

Don, Can you provide a clarification to Milton's request below?

Thanks,

Dennis Galvin, US-APWR Project Manager, NRC/NRO/DNRL/LB2, 301-415-6256

Dennis,

I would like to know if the applicant plans to submit the SASSI subtraction method sensitivity analysis along with the DC/COL reconciliation analysis (now to be submitted in April 2012).

These are two different things and I would like to follow up on the subtraction method sensitivity study. These are both mentioned in the supplemental response.

From the response I understand that both subtraction method and reconciliation analyses will be submitted together, but I would like to confirm this, if possible.

Thanks,

Milton
