SUBJECT: KEWAUNEE POWER STATION  
NRC SECURITY BASELINE INSPECTION REPORT 05000305/2012402(DRS)

Dear Mr. Heacock:

On February 2, 2012, the U. S. Nuclear Regulatory Commission (NRC) completed a security baseline inspection at your Kewaunee Power Station. The inspection covered one or more of the key attributes of the security cornerstone of the NRC's Reactor Oversight Process. The enclosed inspection report documents the inspection results, which were discussed on February 2, 2012, with Mr. R. Simmons and other members of your staff.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspector reviewed selected procedures and records, observed activities, and interviewed personnel.

Based on the results of the inspection, no findings of significance were identified. However, one licensee-identified violation, which was determined to be of very low security significance, is listed in this report. The NRC is treating this violation as a Non-Cited Violation (NCV) consistent with Section 2.3.2 of the NRC Enforcement Policy because of the very low security significance of the violation and because it was entered into your corrective action program. If you contest the subject or severity of an NCV, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the U. S. Nuclear Regulatory Commission, ATTN.: Document Control Desk, Washington DC 20555-0001; with a copy to the Regional Administrator, U. S. Nuclear Regulatory Commission – Region III, 2443 Warrenville Road, Suite 210, Lisle, IL 60532-4352; the Director, Office of Enforcement, U. S. Nuclear Regulatory Commission, Washington, DC 20555- 0001; and the Resident Inspector Office at the Kewaunee Power Station.
