Dear Dr. Armijo:

I am responding to your letter dated February 16, 2012, regarding the Advisory Committee on Reactor Safeguards meeting on February 9–11, 2012.

During the full Committee meeting, the staff discussed guidelines it considers acceptable when the number of available electric power sources is less than the number of sources required by the limiting conditions for operation. We appreciate the Committee's comments and cooperation during the review of Regulatory Guide 1.93, "Availability of Electric Power Sources." We intend to issue the final regulatory guide in March as per the Committee's recommendation.

Sincerely,
