Scott

I have incorporated all of your comments, see attached. There is an additional change we should make in order to make the statement about consideration of public comments "more correct." See information below:

"the staff's consideration of public comments received related to the environmental review" = original  
"the staff's consideration of public comments received on the SEIS;" = Your proposed changes.  
"the staff's consideration of public comments received during Scoping and on the SEIS;" = my proposed changes.

I wanted to be sure we did not exclude the fact we took public feedback during the Scoping phase of the review not just the SEIS. Please let me know if you are with my proposed changes.

Thanx  
Alicia

Scott

Attached is the Director's hilite for the publication of North Anna's final SEIS.  
If you have any comments, let me know.  
If not, Bev could you send forward this the office TA to be included in this week's edition of hilite's.  
Thanx

A/30
