Subject: Request additional information for license termination
(NOTE: This will be used as the Documents Title in ADAMS)

The licensee had sent in a letter requesting license termination. The facility was authorized for 35.200 and only used Technetium-99m and Thallium-201. The submitted close-out surveys were acceptable. The licensee referenced that all sealed sources were transferred to The Heart Care of Southern Maryland, LLP (their other location in Clinton, Maryland). I asked for a copy of their Maryland license (MD-33-212-01) and copies of their sealed source inventory and leak test records showing the transfer of sealed sources.

Action Required: Wait for requested information and then process license termination.
