**Subject:** William States Lee III Nuclear station

We oppose the nuclear power plant proposal for numerous reasons:

- Safety- We all have to have concerns about safety when we look at the use of nuclear energy...failed plants have contributed significant danger to communities worldwide. From Three Mile Island, Chernobyl, to Fukushima, populations have been exposed to health risk by exposure. This plant is 60 miles from Asheville, which is located along a seismological fault area. Leakage is likely to affect children as well as adults.
- Waste disposal- To date we do not have a source of long term safe disposal/storage.
- Expense- With the merger of Progress Energy and Duke, we will all be footing the bill.
- Water will be needed for cooling and the most likely source would be western North Carolina. We already have limited sources for water and a political battle over maintaining it.
- Design- modern designs for safety must be undertaken to prevent earthquake damage.

Sincerely,

Cynthia and Michael Justice
