Subject: Ross ISR Project

Mark,

I received your voicemail this morning concerning the Ross project. The site visit will commence at 0800 on Mon, Aug 22. Participants will meet at Strata Energy's office in Oshoto, where Strata and the NRC will make brief presentations. The day will be spent driving/walking the site, and asking/answering questions.

On Tue, Aug 23, at your office in Sheridan, the folks from the NRC team (about 4 or 5 of us) want to meet with DEQ folks, mainly in a general manner, and ask questions about what is of interest to the State about the site and what is being proposed. I believe a general meeting involving all the various divisions would be preferred. In this way, everyone hears what is being explained, and for the NRC, we would only have to explain it once. Is 0900 to 1200 good for you? Thank you.

Regards,

Alan B. Bjornsen
