Mr. Carlos Martinez
GE-Hitachi Nuclear Energy
6705 Vallecitos Road
Sunol, California 94586

SUBJECT: NRC INSPECTION REPORT 07001220/2012-001(DNMS) – GE-HITACHI
NUCLEAR ENERGY

Dear Mr. Martinez:

On January 24, 2012, the U.S. Nuclear Regulatory Commission (NRC) conducted an inspection of your licensed activities at Clinton Power Station, Clinton, Illinois, with continued in-office review through February 13, 2012. The in-office portion of the inspection consisted of a review of the documents that were requested during the onsite inspection and were provided on January 31, 2012. The inspector discussed the results of the inspection with you during a final telephonic exit briefing conducted on February 13, 2012.

During this inspection, the NRC staff examined activities conducted under your license related to public health, safety, and security. Additionally, the staff reviewed your compliance with the Commission's rules and regulations, NRC Orders, and with the conditions of your license. Within these areas, the inspection consisted of selective examinations of representative records, interviews with personnel, and a review of planned radioactive material quantities of concern (RAMQC) transportation activities that were being performed under your license. Within the scope of this inspection no violations of NRC requirements were identified; therefore, no response to this letter is required.

In accordance with Title 10 of the Code of Federal Regulations (CFR) 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

C. Martinez
