SUBJECT: REQUEST FOR CONSULTATION AND PARTICIPATION IN THE  
SUPPLEMENTAL SCOPING PROCESS REGARDING THE REVIED SITE  
LAYOUT FOR THE BELL BEND NUCLEAR POWER PLANT COMBINED  
LICENSE APPLICATION REVIEW

Dear Ms. Kurkul:

The U.S. Nuclear Regulatory Commission (NRC) staff is reviewing a revised environmental report (ER) submitted on March 30, 2012, by PPL Bell Bend, LLC (PPL) in support of its initial application for a combined license (COL) for the construction and operation of one new nuclear power plant at its Bell Bend Nuclear Power Plant (BBNPP) site near Berwick, Pennsylvania. This revised ER provides detailed information regarding PPL's revised site layout, which was developed to avoid wetland impacts by relocating the power block footprint and other plant components. The revised ER is available through the NRC's Agencywide Document Access Management System (ADAMS) and is accessible at <http://www.nrc.gov/reading-rm/adams.html> under the ADAMS accession number ML12145A242. The document is also available on the Internet at <http://www.nrc.gov/reactors/new-reactors/col/bell-bend/documents.html#application>.

As part of the review of the COL application, the NRC is preparing an environmental impact statement (EIS) as required by Title 10 of the *Code of Federal Regulations* (CFR) Part 51, the NRC's regulation that implements the National Environmental Policy Act of 1969, as amended (NEPA). The U.S. Army Corps of Engineers (USACE), Baltimore District, which is a cooperating agency with the NRC for the purpose of complying with NEPA, is reviewing a joint permit application (JPA) that was submitted by PPL in June 2011 (and was revised in November). The EIS will document the NRC and USACE staff's evaluation of the impacts from the construction and operation of one new nuclear plant at the BBNPP site. In addition, the EIS will consider alternatives, including an evaluation of alternative sites. The following four alternative sites will be evaluated in the EIS: the Montour site located in Derry Township in Montour County, Pennsylvania; the Humboldt site located in Humboldt Industrial Park west of the City of Hazleton in Luzerne County, Pennsylvania; the Seedco site located in Coal Township in Northumberland County, Pennsylvania; and the Martins Creek site located in Warren County, New Jersey, along the Delaware River.

The purpose of this letter is to inform you that the NRC and USACE are providing the public with an additional opportunity to submit scoping comments on new information provided by PPL regarding the revised site layout. Please provide any information, comments, or concerns you

feel are appropriate on the scope of the review, especially related to the revised site layout during the scoping comment period, which ends on July 16, 2012. Comments should be submitted either by mail to the Chief, Rulemaking, Announcements, and Directives Branch, Division of Administrative Services, Office of Administration, Mail Stop TWB-05-B01M, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001 or by e-mail to [BBNP.COLEIS@nrc.gov](mailto:BBNP.COLEIS@nrc.gov). When the NRC and USACE staff completes the draft EIS, a copy will be sent to your office for comment. This letter is also being submitted under the provisions of the Endangered Species Act of 1973, as amended (ESA), the Fish and Wildlife Coordination Act of 1934, as amended (FWCA), and the Magnuson-Stevens Fishery Conservation and Management Act, as amended (MSA) by the Sustainable Fisheries Act of 1996 (SFA).

On October 10, 2008, PPL submitted its application for a COL pursuant to NRC requirements in 10 CFR Part 52. The NRC staff accepted the application for docketing on December 15, 2008. The NRC and USACE first initiated consultation with your office by letter dated January 12, 2009 (ML083460637). To date, the NRC has not received a response.

To support the preparation of the EIS and to ensure compliance with Section 7 of the ESA, the NRC and USACE request that your office provide a list of Federally-listed, proposed, candidate species, and critical habitat under the jurisdiction of National Marine Fisheries Service (NMFS) that may be in the vicinity of the BBNPP site, the associated transmission line rights-of-way, and the alternative sites. In support of the MSA, the NRC and USACE also request your office provide a list of Federally managed species that have designated essential fish habitat in the vicinity of the BBNPP site. In addition, please provide any comments, concerns, or information you consider appropriate under the provisions of the FWCA. Enclosed with this letter are site maps for the proposed site and the alternative sites.

The BBNPP project boundary consists of approximately 2,055 acres in Salem Township, Luzerne County, Pennsylvania, approximately 5 miles northeast of Berwick, Pennsylvania, near the west bank of the North Branch Susquehanna River, and it contains the BBNPP site and the Susquehanna Steam Electric Station (SSES) site. As a result of the revised site layout, the BBNPP site comprises an area of 975 acres within the BBNPP project boundary in an area of open deciduous woodlands interspersed with grasslands, previously cultivated fields, and orchards. The area of disturbance within the BBNPP site is approximately 677 acres. Land use in the immediate vicinity of the site is primarily forested and agricultural. The BBNPP site is located to the west of the SSES site, which has two operating boiling water reactors, Units 1 and 2, that have the capacity to generate 2,270 megawatts of electricity (MW(e)) combined. PPL is proposing to construct and operate an AREVA U.S. EPR reactor with an approximate output of 1,600 MW(e).

PPL has stated there is no need for new transmission lines or corridors to connect the new reactor unit to the existing electrical grid. The existing 500-kilovolt (kV) transmission line is currently being modified to add the Susquehanna-Roseland Interconnection approved by the Pennsylvania, New Jersey, and Maryland Regional Transmission Organization. This modification was planned independent of and without consideration of the BBNPP project. On the BBNPP site, planned facilities include one new 500-kV switchyard to transmit power from BBNPP, one new 500-kV transmission system switchyard (Susquehanna 500-kV Yard #2), expansion of the existing Susquehanna 500-kV Yard, and two new 500-kV, 4,260 megavolt-ampere circuits on individual towers connecting the BBNPP substation to the existing SSES

500-kV yard and to the proposed Susquehanna Yard #2. Additionally, the 230-kV transmission

lines currently passing through the BBNPP site would be relocated to run to the north of Beach Grove Road in order to provide a buffer from the cooling towers and provide additional areas for the location of structures.

The proposed cooling system consists of a closed-cycle wet cooling system. The system will use two natural draft cooling towers for heat dissipation. An average rate of 23,808 gallons per minute would be withdrawn from the Susquehanna River to make up losses from evaporation, cooling tower drift, and blowdown discharge. Blowdown from the cooling towers would discharge to a common retention basin prior to discharging to the Susquehanna River.

If you have any questions concerning the environmental review of this COL application, please contact Mrs. Laura Quinn-Willingham, Environmental Project Manager, at 301-415-2220 or via e-mail at [Laura.Quinn-Willingham@nrc.gov](mailto:Laura.Quinn-Willingham@nrc.gov). In her absence, please contact Mr. John Fringer at 301-415-6208 or via e-mail at [John.Fringer@nrc.gov](mailto:John.Fringer@nrc.gov).

Sincerely,

**/RA/**
