

April 2, 2012

Mr. Roger Svaleson, Vice President
Security and Emergency Preparedness
Exelon Corporation
PO Box 805398
Chicago, IL 60680-5398

Dear Mr. Svaleson:

I want to thank you again for speaking at this year's Regulatory Information Conference (RIC) during our session on "The Safety-Security Interface at Nuclear Power Plants – An International Interest." Your presentation on how Exelon approaches managing the safety-security interface across its fleet of operating reactors was particularly informative, and provided a valuable perspective on how the industry is meeting our regulations in this area, as well as the critical importance of effective communications across the organization. The level of interest from the audience was evident in the many questions we received during the session. I also want to thank you for your contribution during the question and answer portion of our session. I appreciate the thoughtful, comprehensive answers you provided to several of the questions. As you know, due to time constraints, we were not able to answer all of the questions submitted to the panel. As such, and in follow-up to my commitment that we would post on the U.S. Nuclear Regulatory Commission (NRC) RIC website answers to those questions we didn't get to during the session, I am reaching out to each of the panel members and asking if they wouldn't mind providing a response to those questions germane to their respective presentations. I have enclosed one such question (see page 3 of the Enclosure) and am respectfully requesting that you provide a response by April 17, 2012, to David Diec (David.Diec@nrc.gov), who helped coordinate our session.

For your information, audio and video files for the opening session; Commission plenary sessions; Regional Administrators' session; and the Special Plenary Session, "Operating and New Reactors Panel Discussion: NRC and Industry Perspectives," are now available at <http://video.nrc.gov/>. All final presentation slides, audio recordings, and questions that were not addressed during the technical sessions are being compiled and will be posted within the next few weeks on the NRC's RIC website at: <http://www.nrc.gov/public-involve/conference-symposia/ric/index.html>.

The number of participants at this year's RIC reached over 3,000 with international representation from 35 countries. As indicated by the initial feedback received, this year's RIC was successful in achieving the NRC's goals of dispersing information, fueling thought, and providing a venue for discussion on topics pertinent to nuclear regulation and the nuclear industry. It is your commitment and support that helped to make the RIC a success.

R. Svaleson

Again, thank you for your valuable contribution in making our panel session a success at this year's RIC.

Sincerely,

/RA/

Marc L. Dapas, Deputy Director
Office of Nuclear Security
and Incident Response

Enclosure: As stated
