Subject: RAI extension request.

Dear Ms. Montgomery,

As we discussed in our 17 February meeting and subsequent phone calls, due to circumstances beyond my control (my teaching load, work load, staffing shortage) we are unable to meet the previously set goals for response to the remaining RAIs for PUR-1 relicensing. I have contacted Argonne National Laboratory, and will receive some very limited assistance, but most of the work to develop the responses will fall to myself.

Therefore, I am requesting an additional extension on target date for completion of the responses to 31 January 2013. It is my goal to be able to submit 1-2 question responses per week in the intervening months, but I feel positive that all of the responses can be submitted by this date.

Thank you for your consideration in this matter.

Regards,

--jere
