Subject:

Additional information and clarification of amendment request

(NOTE: This will be used as the
Documents Title in ADAMS)

The reviewer asked the status of the sealed sources transferred to the Trumbull location. Mr. Wishko indicated that they were in storage pending disposal since the Trumbull facility had its own sources. Regarding the old Co-57 sources disposed as ordinary waste, Mr. Wishko indicated that, after decay-correcting them and surveying them to confirm no radiation levels above background, he made sure that there was no visible indication that the materials had ever contained radioactivity above background. The reviewer pointed out that decay-in-storage regulations in Part 35 applied to materials whose half lives were up to 120 days and therefore, since the half life of Co-57 exceeded 120 days, disposal as ordinary waste was not an option without an exemption. As a result, there may be some follow up regarding the apparent violation involving unauthorized disposal. The reviewer also pointed out that the close out results provided did not contain the data needed to evaluate the close out results. He said it was an oversight and will fax them to the R-I office soon.
