

April 26, 2012

Mr. John Elnitsky
Vice President, Nuclear Plant Development
Progress Energy Florida, Inc.
P.O. Box 14042
Saint Petersburg, FL 33733

SUBJECT: NOTICE OF AVAILABILITY OF THE FINAL ENVIRONMENTAL IMPACT
STATEMENT FOR THE COMBINED LICENSES FOR LEVY NUCLEAR PLANT
UNITS 1 AND 2

Dear Mr. Elnitsky:

The U.S. Nuclear Regulatory Commission (NRC) staff has completed NUREG-1941, "Environmental Impact Statement for Combined Licenses (COL) for Levy Nuclear Plant Units 1 and 2: Final Report." The U.S. Army Corps of Engineers (USACE), Jacksonville District, is a cooperating agency on the final environmental impact statement (FEIS). Enclosed is a copy of the *Federal Register* Notice of Availability. This notice advises the public that the final report is available for public inspection at the NRC Public Document Room or from the publicly available records component of NRC's Agencywide Documents Access and Management System (ADAMS) under Accession Numbers ML12100A063, ML12100A068, and ML12100A070. ADAMS is accessible from the NRC website at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room), and from the NRC website at www.nrc.gov. In addition, the following four public libraries have agreed to make the FEIS available for public inspection: the Citrus County Coastal Region Library, located at 8619 West Crystal Street, Crystal River, Florida; the Dunnellon Branch Library, located at 20351 Robinson Road, Dunnellon, Florida; the AF Knotts Public Library, located at 11 56th Street, Yankeetown, Florida; and the Bronson Public Library, located at 600 Gilbert Street, Bronson, Florida.

As discussed in the final environmental impact statement (FEIS), the NRC staff's recommendation related to the environmental aspects of the proposed action is that the combined license application should be issued. This recommendation is based on: (1) the Environmental Report (ER) submitted by Progress Energy Florida; (2) consultation with Federal, State, Tribal and local agencies; (3) the NRC staff's independent review; (4) the staff's consideration of comments received during the environmental review; and (5) the assessments summarized in the FEIS, including the potential mitigation measures identified in the environmental report and in the FEIS. In addition, in making its preliminary recommendation, the NRC staff has concluded that there are no environmentally preferable or obviously superior sites in the region of interest.

J. Elnitsky

-2-

The NRC's determination is independent of the USACE determination of a Least Environmentally Damaging Practicable Alternative pursuant to the Clean Water Act, Section 404(b)(1) guidelines. The USACE will conclude its analysis of offsite and onsite alternatives, and issue its decision on the permit application in its Record of Decision, which will be issued after the FEIS.

A separate notice of filing of the FEIS will be placed in the *Federal Register* through the U.S. Environmental Protection Agency which is anticipated to be published by May 4, 2012. If you have any questions regarding this matter, please contact the NRC Environmental Project Managers. Mr. Douglas Bruner can be reached at 301-415-2730 or via e-mail at Douglas.Bruner@nrc.gov, and Mrs. Mallecia Sutton can be reached at 301-415-0673 or via e-mail at Mallecia.Sutton@nrc.gov.

Sincerely,

/RA/

David B. Matthews, Director
Division of New Reactor Licensing
Office of New Reactors

Docket No.: 52-029 and 52-030

Enclosure:
As stated

cc w/enclosure: See next page
