**Subject:** Smiths Detection Termination Request (MC577072) Follow-up regarding termination request

Dear Mr. Keosian:

I contacted Mr. P. Madairy, RSO Inc., to clarify that Smiths wants to change the address on the current NRC License No. 29-28620-01 from Morristown, NJ to Ijamsville, MD, and to inform him that Smiths will have to submit an application for a new license. I explained that if Smiths Detection wants the address to be changed, the NRC would be required to terminate the current (or renewed) licensee and issue a new license with a new license number because the first two digits of the license number are state identifiers. Therefore, Smiths Detection license with a MD address will begin with 19.

Mr. Madairy stated that he understood the process and he will discuss this with Smiths Detection. He stated that he feels that Smiths Detection will likely continue with the request to terminate License No. 29-28620-01 and submit a new license for the MD address.

Next week sometime, I would like to personally discuss this issue with Mr. Robert Wisner and yourself to ensure Smiths Detection understands the process and to verify the intentions of Smiths Detection.

I also discussed with Mr. Madairy the requirements of reciprocity, while Smiths Detection does not have an NRC License. Mr. Madairy fully understands the requirements. Also, when we speak next week, we'll discuss these requirements to ensure Smiths Detection understands them, too.

Also, Mr. Madairy stated that he called the general phone number for fees and had not yet received a reply. I informed him that I would locate a contact person and phone number and provide to him in an e-mail as soon as possible.

Please try:
