On March 27, 2012, the U.S. Nuclear Regulatory Commission (NRC) staff held a public meeting<sup>1</sup> with the Nuclear Energy Institute (NEI) and industry representatives to review and assess the recommendations in the *Near-Term Task Force (NTTF) Recommendations for Enhancing Reactor Safety in the 21st Century* report, issued July 12, 2011<sup>2</sup>. The meeting was originally to be focused on the NTTF Recommendations 2.3, flooding protection walkdowns, which are part of the Tier 1 recommendations under consideration for implementation without unnecessary delay. However, during this meeting the prioritization guidance developed by the NEI<sup>3</sup> was the majority of the discussion.

The NRC staff opened with a discussion of the purpose of prioritizing the due dates for the flooding hazard evaluations, which was to accommodate the limited resources to some areas of the evaluations. This was followed by a walkthrough of the NEI guidance. The NRC staff asked questions throughout the walkthrough. The questions focused on the criteria chosen and their associated weighting factors as well as how the final rankings would translate to the 1, 2, and 3 year due dates for submitting the hazard evaluation.
