(NOTE: This will be used as the
Documents Title in ADAMS)

Licensee submitted updated drawing of its nuclear cardiology department. The licensee indicated that an area once used for performing cardiac stress tests (an area of use for RAM) was being converted to an EKG prep room (an unrestricted area). Both of these areas are within the nuclear cardiology department. The Department Administrator and the Chief Technologist stated that the only radioisotope used in the department is Tc99m. The Chief Technologist further stated that the last use of RAM in the area previously used for stress tests was March 23, 2012.

Action Required: Process amendment.
