**Subject:** RE: Sibley Hospital- License Amendment attached  
**Attachments:** SouthernMaryland License.pdf; DeFranco Credentials.pdf

Ms. Nguyen,

I'm sending this as a follow-up to my phone message.

I am a consultant health physicist for Sibley Memorial Hospital and have some additional information for you regarding Dr. DeFranco. I am forwarding a copy of a Maryland license that listed Dr. DeFranco as an authorized user of 35.100 and 35.200 materials dated prior to October 24, 2002. This license was used to document that Dr. DeFranco is exempt from the training requirements in part 35.57 (b)(1). Dr. Wolfman mentored Dr. DeFranco in the use of I-131 and signed the preceptor documents that you had previously received (copy attached). The State of Maryland used the combination of these three documents to grant Dr. DeFranco authorization for 35.300 materials. At this time, Sibley Memorial is requesting that Dr. DeFranco be authorized for use of I-131 less than and greater than 33 mCi.

Best regards,  
Michele

Michele Loscocco, MS, DABR  
Diagnostic Medical Physicist
