Re: Control # 576823 -- Amendment of License No. 21-08966-01

In response to the request for additional information, we have included a Transfer of Control document and a copy of the Certificate of Assumed Name.

If you have questions, please contact the Director of Diagnostic Imaging, Roger Skrabut at 989-953-5155 or by email at Roger.Skrabut1@mclaren.org.

Sincerely,

A handwritten signature in cursive script that reads 'Sheri Myers'.

Sheri Myers, RN
Vice President Patient Care Services

TRANSFER OF CONTROL**PER INFORMATION APPENDIX G, NUREG-1556, VOLUME 15**

NRC License # 21-08966-01

Current name: Central Michigan Community Hospital

The new name will be: McLaren Central Michigan

The license contact name is: Roger Skrabut at 989-953-5155

1. On September 30, 2010, Central Michigan Community Hospital became an affiliate member (subsidiary) of the McLaren Health Care Corporation (parent). There were no transfers of stock or assets to the McLaren Health Care Corporation. All assets, liabilities and Net Assets remain with Central Michigan Community Hospital and the community at large. The assumed name change (see attached Certificate of Assumed Name) represents the initiative of system-wide branding of the facilities and services for the McLaren Health Care Corporation.
2. All currently approved users for the licensee will remain without change. The Radiation Safety Officer for this license will remain as James M. Botti, MS.
3. There is no physical change in location. Central Michigan Community Hospital will no longer operate once the transfer is complete. All activities will be under McLaren Central Michigan, 1221 South Drive, Mount Pleasant, Michigan. All required records regarding the use and possession of licensed materials will be current at the time of the transfer. The status of compliance will be maintained before, during and after the merger. All of these records are maintained on site.
4. All required documents and records are currently kept in accordance with the NRC license conditions. These include, but are not limited to, the annual calibration of survey instruments, semi-annual leak testing of non-exempt sealed radioactive sources, radiation monitoring and personnel exposure monitoring reports. Radiation monitoring is performed as required by the NRC licensee on a daily basis for acceptable radiation levels and weekly for removable contamination.

We confirm the areas of storage, preparation, handling, and administration of radioactive materials are surveyed daily for acceptable radiation levels and weekly for removable contamination. If contamination of these areas is detected during these daily or weekly surveys, decontamination is undertaken and completed at that time. The unsealed radio-nuclides in use at this location are all short-lived (i.e. half lives less than 65 days, most less than 10 days). Therefore,

radioactive contamination is highly unlikely at this facility. If contamination were present, it would be discovered prior to the transfer. Record will be maintained on site of inventories of sealed sources and spills of radioactive materials.

5. McLaren Central Michigan accepts full responsibility for the site. This facility is exempt from providing financial assurance for decommissioning because of the type of radioactive materials used (i.e. short-lived, unsealed sources in small quantities only). Routine radiation monitoring of the facility ensures that contamination will not be transferred during any subsequent change of ownership.
6. McLaren Central Michigan agrees to abide by all commitments and representations previously made to the NRC by Central Michigan Community Hospital.
7. All parties involved with the transfer are aware and agree to the planned transfer of ownership.
