Dear Dr. Petrella:

Enclosed is Amendment No. 8 renewing your NRC Materials License No. 21-26346-01 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

As discussed with John Hoyle, Nuclear Medicine Technologist, by telephone on April 17, 2012, we have added license condition 15 the requires you develop, implement and maintain emergency procedures for safe response to emergencies involving the transport of radioactive materials, we have removed the materials in 35.100 from the authorization for temporary jobsites because these materials are not used at temporary jobsites, and kept the address of use listed in Condition 10.A. the same as Amendment No. 7.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

D.Petrella

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,
