Subject: GNF-A Request to Retract Event Notification Report (EN 47723)

References: 1) NRC License SNM-1097, Docket 70-1113
2) GNF-A Event Notification 47723, 3/7/12
3) Letter, S.P. Murray to Document Control Desk, 4/5/12, 30-Day Report of Event, Criticality Accident Alarm System (CAAS) Horn Inaudible
4) Letter, S.P. Murray to Document Control Desk, 4/20/12, GNF-A Long Term Corrective Action (EN 47723)

Dear Sir or Madam:

Upon further review, GNF-A has determined that the reported condition (EN 47723) was not required to be reported by the plain letter of regulation [10 CFR 70.50 (b)(2)] and the filing of the report was inconsistent with industry practice. As such, this report is being retracted. GNF-A has completed the long term corrective action described in Reference 4 and has entered the condition (i.e., areas where audibility of the CWS should be enhanced) into its corrective action program and is addressing them accordingly.

If you have any questions regarding this matter, please contact me at (910) 819-5950.

Sincerely,

Scott Murray, Manager
Licensing & Liabilities
