Mr. Ritchie,

The schedule on the website is based on the best information that is currently available. I do not have any additional information.

Thank you,

Subject: FW: Strata Energy SML Assessment

Johari,

As per today's announcement on the Australian Stock Exchange that Strata Energy's RAI's have been deemed acceptable by the NRC, part of the announcement read "By letter dated 10 May 2012, NRC notified Strata that its RAI responses are complete and, based on this letter, that NRC's progress towards issuance of an SML License continues unabated." Could this be a catalyst for shortening of the current timeline? I note that at present it has not been changed.

Thanks In Advance

Peter Ritchie

Johari,

I appreciate you helping me with my questions and I appologise for taking up your time, however I only have 1 more question which I would like your assistance with. Is it possible for the currently up to date timeline as shown on the NRC website for the issuance of the SML to Strata to be significantly or at all shortened?

Thankyou

Peter Ritchie

Johari,

Thankyou for your response it was much apprciated. Could you tell me what are the possibilities/circumstances of the timeline for the issuance of the Strata's SML being shortened? Is this a possibilty or is it in all likelyhood that the current timeline would be considered to be as short as possible and very little could change to shorten it.

Thankyou

Peter Ritchie

Good afternoon Mr. Ritchie,

Information about NRC's review of Strata's license application for the proposed Ross ISR Project, including the current application review schedule, can be found at the web address shown below. The information on this website is updated regularly as new information becomes available. Therefore, please visit our website for the

most up-to-date information. Also, please feel free to contact me or John Saxton (John.Saxton@nrc.gov) if you have any further questions about the NRC's review of Strata's license application.

Subject: Strata Energy SML Assesment

Good Morning,

I am a shareholder of an ASX (Australian Stock Exchange) listed company called Peninsula Energy whose wholly owned subsidiary Strata Energy currently has their application for it's SML under review for it's US operations by the NRC. It is my understanding that this has been outsourced for review to Attenuation Environmental Company. In your opinion when would the most likely completion date of this review be, as to allow the NRC to award the SML to Strata Energy?

It is my understanding that to complete the review 2760 hours of work must be completed by Nov 2013, is it possible that this work can or will be completed earlier than this timeframe? Any information you can provide would be much appreciated.

Thankyou in Advance

Peter Ritchie
(Australian Shareholder in Peninsula Energy)
