Subject: RE: RAI 333 Response

Wayne,

That is fine. It is your decision what to include in your response and when to issue it. My concern was not relative to the changes to section 3.8 (which the same technical branch is responsible for reviewing) but the changes to the previous response(s) to the other RAIs which were issued by other technical branches (e.g., RAI 279 on section 9.2.5 as mentioned in your previous email). The concern I have is that the reviewers of section 9.2.5 will not automatically see response to this RAI and may not even have a clue that your response to this RAI made changes to a previous response to their RAI that was found acceptable previously. As stated in my voicemail message, we can discuss more on that next week.

Thanks.

SURINDER ARORA, PE

Subject: RAI 333 Response

Surinder,

Received your voice mail indicating the further discussion is required on our going forward proposal for notification of the staff when earlier RAI responses are impacted by subsequent RAIs. This is acceptable. We can continue discussion on Monday.

Nevertheless, our committed response to RAI 333, Question 3.08.04-31 is due for submittal today. Rather than be late with this response, we will submit our response today with the cover letter as proposed. And anticipate continued conversation on this subject on Monday with you and John Segala.

Note that this RAI was identified by the staff as a follow-up to our earlier RAI 310 response, so the fact that we are augmenting our previous response should have been expected. It is as the staff requested. No change was made to our earlier response, only the inclusion of supplemental ESW information.
