Subject: RE: NOTIF. OF, AND REQ. FOR CMNTS. ON, PROPOSED OPTIONS TO MITIGATE THE ADVERSE EFFECTS OF THE POTENTIAL DEMOLITION OF FERMI 1

Mr. Fringer,

Thank you for keeping me in the comment loop. As we discussed, the American Nuclear Society Local Section would be most likely to submit comments on behalf of ANS, and I believe we verified the address and contact information for the ANS Local Section before the notice was distributed. ANS Headquarters has no further comments.

Best Regards,

Laura Scheele
Manager, Communications & Policy
American Nuclear Society

Dear Ms. Scheele,

Per my voicemail just now, please submit your response today to the letter (attached) I sent in my e-mail below. If I receive no response by close of business today, I will have to assume you have no comments, since the 30 calendar-day time limit expired as of Saturday, 12/17/11.

Sincerely,
John

John Fringer, P.E.

Importance: High

Dear Ms. Scheele,

As I mentioned in my voicemail today, attached is your invitation to comment on the mitigation stipulations in our draft MOA, but since Monroe County Community College is already involved in setting up the exhibit, this letter is basically a formality. If you have no objections to Stipulations I and II, could you please indicate in your reply to this e-mail that you do not have comments on the MOA (or list any comments that you do have)?

Also, were you aware of a planned tour of Fermi 1 (at 1:00 pm on Friday, December 2, 2011)? Per my 12/14/11 phone conversations with Randy Westmoreland, Fermi 3 Environmental Manager [phone: 313-235-3368] at Detroit Edison and Dr. David Nixon, President of Monroe County Community College (MCCC) [phone: (734) 242-7300], the college is very enthusiastic about hosting the Fermi 1 exhibit. It would go in the lobby of the new Career Technology Center, which will have a Nuclear Technology Program. Mr. Westmoreland said a committee (composed of at least one former Fermi 1 employee and representatives of various college disciplines) has been set up by Sue Wetzal, MCCC's VP of Administration, to decide what the exhibit will contain and how it will look. He said no specific decisions have been made yet, but these exhibit components are being discussed:

- continuous loop films
- oral histories (recordings) from former Fermi employees
- paintings
- signatures of visiting dignitaries
- parts of the control room
- photos, diagrams, drawings, etc.

Mr. Westmoreland said the Fermi 1 library has extensive documents and memorabilia.

Thanks very much,
John
