Subject: 2012-05-09 Woodlan, Request for additional time to respond to RAI 6320 (248) and RAI 6348 (251)

Steve,

The purpose of this note is to request additional time to respond to the two subject RAIs. Both are currently due on 5/11/12 and I am requesting an extension until 5/31/12.

RAI 6320 (248) includes Question 19-19 and concerns an evaluation of Extreme Winds and the potential impact on CDF based on several proposed scenarios. RAI 6348 (251) includes question 09.02.01-6 though 09.02.01-11 and concerns ESWS design. I am requesting the additional time to develop the quality of response that I want and that the NRC expects. The development of the response has been impacted by several issues including (but not limited to):

- These issues also involve impacts on the DCD and potentially the SCOLA. This complicates the development of our response and also requires the use of engineering resources that are involved in significant ongoing DCD work.
- The PRA issues involved developing new scenario assessments which is complex, was difficult to properly scope and has been a challenge to properly characterize.

We have made significant progress on both RAIs and believe we can provide quality responses by May 31, 2012.

Donald R. Woodlan
