OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

I am disgusted with the way the NRC kisses the asses of its nuclear masters, with the very real possibility of affecting many, many people. Then again, the new American mantra is "Profits before People", so do what you will, huh?

What a joke this agency has become. Do you know what happened in Japan a few short months ago? Has no effect on your thinking? So, I guess you will make sure the nuclear industry has to provide safeguards at the least expense to them. The save \$\$\$, and you potentially murder human beings.

YEAH, KEEP UP THE GOOD WORK!!!!
