May 23, 2012 (11:45 am)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Nuclear power is proving less and less safe, safety is less and less well monitored, the geology and climate is less reliable and so previous expectations are no longer in place, and safeguards are not being enforced, including those that require the shutdown of older reactors. Please put the money behind renewable energy that is safe, not behind expensive and dangerous nuclear reactors. Imagine terrorists bombing our reactors, or otherwise sabotaging them. Goodbye, America!
